

# Missouri Boating Statistics & Drownings

**2014  
Edition**  

---

**2013  
Statistics**

**Department of Public Safety  
Missouri State Highway Patrol**

# Introduction

This booklet is published by the Missouri State Highway Patrol as an aid to persons who are interested in recreational boating crashes and accidental drowning incidents occurring in the state. It contains information which provides a comprehensive look at statewide crashes and accidental drowning incidents as experienced in 2013.

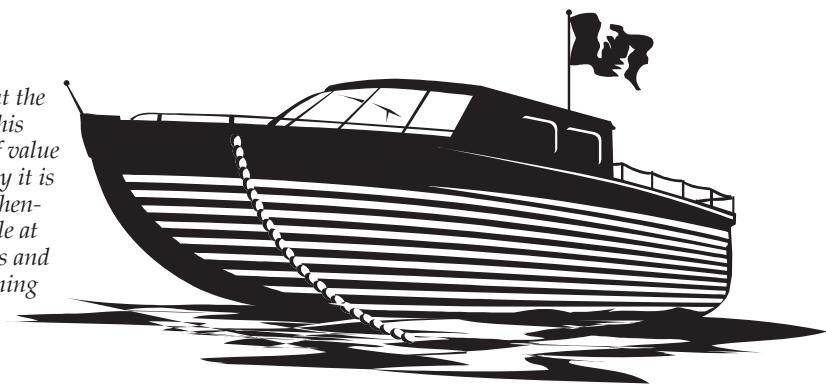

The Missouri State Highway Patrol is the central recreational boating data collection agency for the State of Missouri. The Patrol investigates all recreational boating crashes occurring in the state and either investigates or gathers data on accidental drowning incidents occurring in state and private waters.

## Interesting Statistics

*Here at a glance are some interesting statistics found in this booklet:*

- In 2013 there were 17 persons killed and 88 persons injured in recreational boating crashes in the State of Missouri. This was five more killed and 11 fewer injured than in 2012. There was an decrease of 28% in total crashes statewide compared to 2012.
- In 2013 there were 140 total crashes including 62 property damage only, 61 injury, and 17 fatal.
- "Failed to keep proper lookout" was the leading contributing circumstance for all crashes followed by "inattention." Alcohol was known to have been a contributing circumstance on 42 crashes statewide.
- Capsizing type crashes resulted in the deaths of two persons. This was 12% of the total persons killed in crashes.
- Of all crashes reported statewide, 82% (115) occurred during the months of May through August.
- Most crashes occurred on Saturday (50) and Sunday (30) and most occurred between noon and 8:00 p.m.
- Of all crashes reported statewide, 75% (105) involved only one watercraft. All 17 fatal crashes involved only one watercraft.
- Of 149 boat operators involved in crashes, 79 had no prior boater education.
- In 2013, there were 35 persons killed in accidental drowning incidents occurring in state waters, 18 more than in 2012. In addition, the Missouri State Highway Patrol investigated three accidental drowning incidents that occurred on private property.
- Most drowning incidents occurred on Friday (6), Saturday (11), and Sunday (6) and most occurred during the months of June (12) and August (7).

*It is hoped that the information in this booklet will be of value to you. Certainly it is the most comprehensive look available at statewide crashes and accidental drowning incidents in Missouri.*

## Alcohol Involvement

**Drinking and Crashes** - Whether or not a person has been drinking cannot always be determined at the scene of a crash. It is generally impossible to determine the persons who have had one or a few drinks; yet, these individuals may be as much of a hazard as the obvious drunk. Because of the time lapse from the moment of occurrence until an officer arrives at the scene to make the investigation, a person's condition concerning drinking can change a great deal. In cases where the individual may have been removed to a hospital, doctor's office or funeral home, his condition may never be determined.

### Alcohol/Drugs Involved

#### Fatal Boating Crashes:
